

RSA-S/VGN 3x

Targeting optics

The RSA-S reflex sight, a compact collimator sight, is ideal for fast reaction and close quarters combat. Precision optics and state-of-the-art electronics enable fast target acquisition in all situations. Reliable engagement up to 200m can be easily achieved. The RSA-S reflex sight is watertight and extremely resistant to jolts and vibrations. It is designed for two-eye operation, which allows very fast target acquisition. With only 100g, the RSA-S is truly a lightweight instrument.

Wide ranging conditions demand flexibility and an optimal compromise between balance and weight – on the weapon and the targeting optics. The VGN 3x magnifying adapter is used with the RSA-S for reconnaissance and targeting at longer distances.

RSA-S/VGN 3x

Optical data		
Product	RSA-S	VGN 3x
Magnification	1 x	3x
Field of view (at 1000 m)		70 m
Eye relief	unlimited	55 mm
Elevation adjustment range	120 cm/100 m	
Azimuth adjustment range	120 cm/100 m	
Parallax compensation in m	Parallax-free	
Electrical data		
Power supply	3 V CR 2032 button cell	
Mechanical data		
Length	63.5 mm	106 mm
Weight	100 g	270 g
Interface	fast clamping on Picatinny rail	fast clamping on Picatinny rail
Ambient conditions		
Environmental test	MIL-STD-810G, DIN ISO 9022 (excerpt)	
Features RSA		
Compact and lightweight, hybrid power supply, one-button operation, continuously adjustable brightness of the illuminated dot
