

SKS 120-1 CALIBER BAR

Universal Muzzle Boresight Devices

The higher the hit probability of a weapon, the greater its combat value. Battlefield supremacy, increased survivability and less ammo usage are among the easily achievable advantages of a well-adjusted weapon system. The risks of collateral damage and friendly fire are comparably minimized as is the risk of counter-fire caused by missing the target with the first shot – and missing the target is no option.

The Universal Muzzle Boresight Devices from Airbus DS Optronics provide the cost effective means to adjust aiming sights of almost all firearms in today's service. Being compatible from 5.56 to 155 mm caliber it is usable from factory to crew-level for long and short range alignments. The Universal Muzzle Boresight Devices ensure highest precision, where it is needed – on target.

SKS 120-1 CALIBER BAR

Mechanical Data		Features and Benefits
Length	678 mm	
Stop plate Ø	155 mm	
Weight	4,5 kg	
Protective sleeve	fix	
System Performance		
Tolerance	119,90 - 120,80 mm	
Accuracy (max. deviation relative to gun barrel axis)*	<0,1 mil	
Max. length flash hider/muzzle brake	137 mm	
Compatible Weapon Systems		
Generic 120 mm smoothbore caliber		
General Data		
Environmental test (in extracts)	MIL-STD 810G	
Ordering Numbers		
Material No.	10137438	
NATO Stock No.	4933-12-370-1055	
Accessories		
Standard and customized container solutions available on request		

*In conjunction with SZR boresight telescope
